“ In 1976 as a young couple with three children and no money we needed to remodel the old home we had purchased. Walt met with us and encouraged us to think hard about it--he told us marriages were ruined by remodels and that it was not worth it. We thought about his advice and decided to proceed. Walt kept finding recycled items that we could have instead of buying new things. I treasure our kitchen sink which is one of the many things Walt gave us. What a wonderful man. We remain grateful to him for his many kindnesses. Bruce and Bobbie Weber
