

## Warren Staton

March 28, 1996 - March 28, 2008

Warren Staton, professor emeritus of the civil engineering department at Oregon State University, died at his home in the arms of his family and devoted caregivers on March 28.

Warren was born in Germantown, Pa., on April 4, 1917, to Charles and Mabel Staton. He began his lifelong love of singing at age 12 in the All Saints Church choir in Germantown. He also worked at his brother's Possum Hollow Nursery after graduating from Cheltenham High School.

In 1940 he moved to Puerto Rico to work construction on Vieques Island, where his superintendent introduced him to his daughter, Maryanne Kennedy, who was attending the University of Puerto Rico. Warren and Maryanne were married on July 11, 1943, in Boise, Idaho.

In September 1943, both joined the U. S. Navy, Maryanne as a WAVE and Warren as a Seabee (140th Construction Battalion); he served two years in the South Pacific. After the war, he attended Boise Junior College before transferring to Oregon State College, where he earned Bachelor of Science and Bachelor of Arts degrees in 1950 and a Master of Science in civil engineering in 1951.

The couple's love of adventure and travel took them on a five-month bicycle trip through Europe in 1949, extended by five years when Warren took a job with the U.S. Army on reconstruction projects. It was then that they met the Fritze family; the families have remained close since, traveling to each other's homes and meeting for camping adventures. Daughter Laurie was born in

Heidelberg. Warren continued to enjoy traveling immensely during his retirement years.

Returning to Corvallis, Warren was employed with CH2M prior to joining the faculty at Oregon State University in 1957. He spent a year in study and research at the University of Wisconsin, Madison, in 1965. He was dedicated to his teaching and took personal interest in his students, counseling and encouraging whenever needed. Many students expressed appreciation for his help at crucial times in their lives. Warren served the city of Corvallis as an engineering consultant and as a member of the Planning Commission and Bicycle Committee. Teaming with his wife of 64 years, he volunteered with the Vina Moses Center, the Grace Center, the Old Mill Center and with many church committees.

He had a passion for classical and church choral music. He cherished singing in the choir of the Church of the Good Samaritan for more than fifty years, and also with the Corvallis Barbershop and the Linn-Benton Community Choir.

The family has fond memories of joyful singing of hymns, WWII-era sweetheart songs and Beatles tunes with him and for him in the car, around the campfire, by the piano at home and — at the end of his life — around his bed.

Warren loved the out-of-doors, expressing constant awe and thankfulness for God's creation and nature's boundless diversity and beauty. In the '70s, Warren and Maryanne designed and built a cabin in Central Oregon, raising beams with block and tackle and roping themselves in to shingle a steep roof. Camping, fishing and hiking were lifetime pursuits with his family.

Warren was most grateful for his family above all. He was a devoted husband, father and grandfather who never failed to express his love. He is survived by his wife; his daughters, Laurie Staton, wife of Ian Rothfels, of Salt Lake City, Utah, and Clare Staton, wife of Greg Smith, of Corvallis; grandchildren Adam Staton-Smith, Laurel Staton-Smith and Lily Smith; and nephews Tom Staton of Hawaii and Robert Warren Staton of Florida.

A memorial service will be held at 2 p.m. Saturday, April 5 at the Church of the

Good Samaritan, 333 N.W. 35th St.

Memorial contributions can be made to the Church of the Good Samaritan Music Ministry, Schools of Sinkunia (African Education Project) c/o 2625 S.W. Whiteside Drive, Corvallis, or Oregon State University Foundation (Apperson Hall Renovation) 850 S.W. 35th St., Corvallis

“ I was one of Warren's students 30 years ago, and he became one of my most admired professors. I still remember the first day of class, when he introduced himself and then had each of us tell a little about ourselves, which was quite unusual. I did well, and despite my relentless questions and time in his office after class, he spent time with me and there was never any doubt he cared how I did. I kept in touch with him and was quite surprised the next year, even though it was outside my major field and I was an undergraduate, he asked me to become a teaching assistant for his Strengths of Materials class. I jumped at the chance to work with someone that shared my own sense of enthusiasm for life and work, and Warren encouraged me to conduct mini-lectures during class time that consisted of real-life examples of engineering phenomenon. Once I purchased taffy bars for everyone in class and together we pulled them apart, noting the stress/strain, brittleness and necking. I can still remember his ready smile from the sidelines encouraging me. Before I left for my first job in Virginia, he made it a point to meet with me to send me off with a smile and characteristic twinkle in his eye that made me know I'd be a success. I'll remember Warren as someone who genuinely cared for the people he met, and I remain indebted to him for his knowledge and encouragement.

“ Dear Staton Family; I was deeply saddened to hear of Warren's passing I have many fond memories of him as a kid on Jackson Ave. May the knowledge that he is singing in the choir with angels bring you smiles and strength at this difficult time.
